

Project Name	Extraordinary Circumstance	Present	Significant Effect?	Information/Requirement
Erickson Ridge Exploration	B1 - Floodplains or Wetlands	Yes	No. Design features sufficient to avoid impacts to floodplains, wetlands, and RHCA.	Is the following a common Design Feature? <i>"Place weed free straw bales or install silt fence in places as identified by a Forest Service representative to minimize sediment migration from stockpiles and disturbed ground."</i> I ask due to requirement of having a FS representative. This feature is included for the other two exploration projects
	B2 - Municipal Watersheds	Yes	No
